

The **GROVE GMK 4080** mobile crane with a lifting capacity of **80 tons** and a boom of **66 meters**, is one of the most popular cranes of the **LUKAS-CRANE** company.

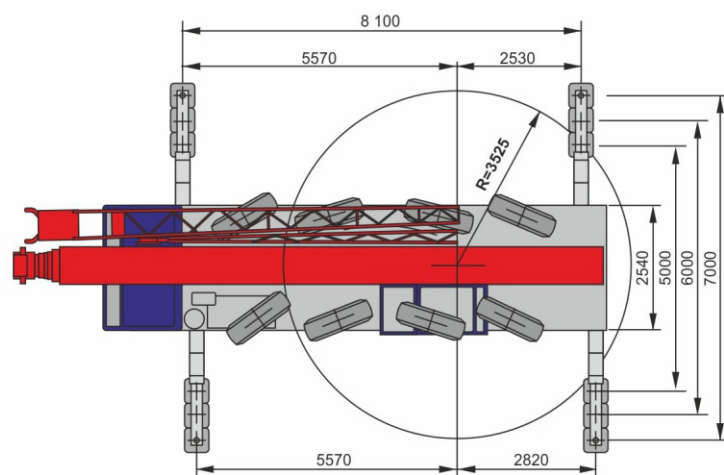

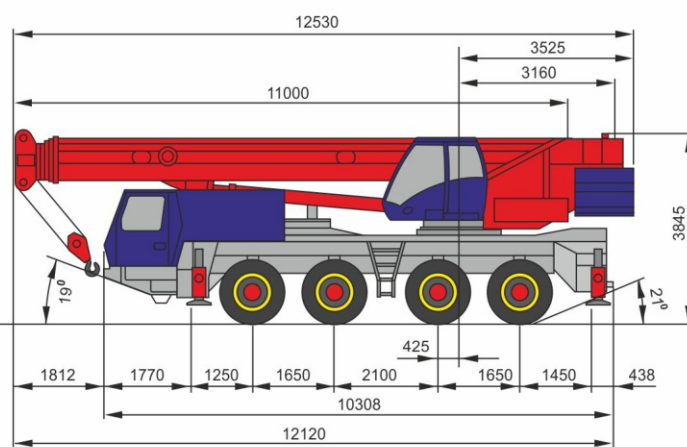

The mobile crane of our company **GROVE GMK 4080** is an allterrain vehicle with a wheel arrangement of **8x8** - all **4** axles of the crane are leading, the automatic transmission has a transfer case with a low gear. Axle and center differential locks provide additional flotation. The **GROVE GMK 4080** has absolutely all **4** steered axles, which makes it very maneuverable and allows you to enter ordinary gates from narrow roads, turn around in a small radius and move along diagonals (crab movement).

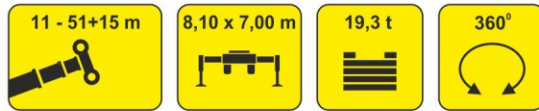

The **GROVE GMK 4080** mobile crane has a support contour of **8.1 x 7 meters**. The working area is **360 degrees**! The telescopic boom has a range of **11 to 51 meters**. The **15 meter** swing away lattice jib extends its length to **66 meters**!

The choice of speeds for each operation and their full combination, gives the **GROVE 80 tons** mobile crane high productivity in any type of work. Combined with high maneuverability and maneuverability (four-wheel drive), the services of this truck crane are ideal for most construction sites.

The services of a **GROVE** mobile crane of **80 tons** are often used for the installation of heavy equipment, transformer substations of **БКТП**, concrete and asphalt plants, machine tools, presses, equipment in production facilities, loading and unloading heavy, oversized cargo on wagons and trawls, launching boats, yachts and many other works that you can see in our gallery.

You can rent a **GROVE GMK 4080** mobile crane, with a lifting capacity of **80 tons**, by calling our consultant managers. The **LUKAS-CRANE** company also provides engineers for detailed consultations to your facilities in St. Petersburg free of charge!
