

All Terrain Crane 4x4

35t

/28m

7m

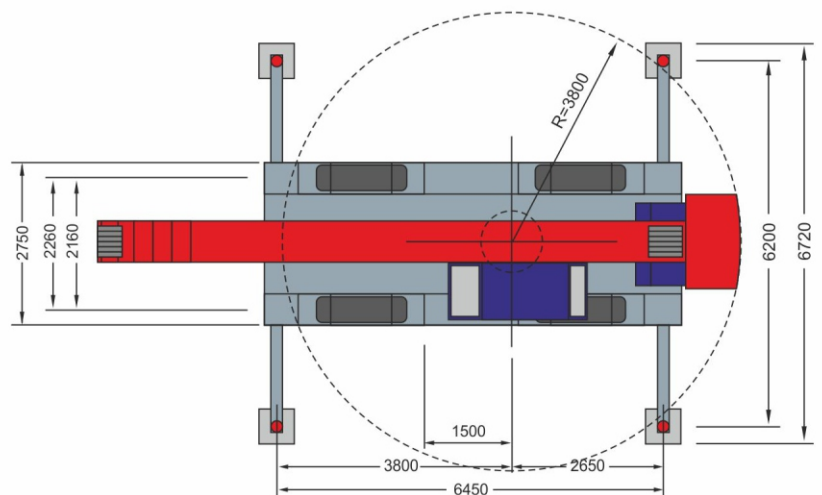

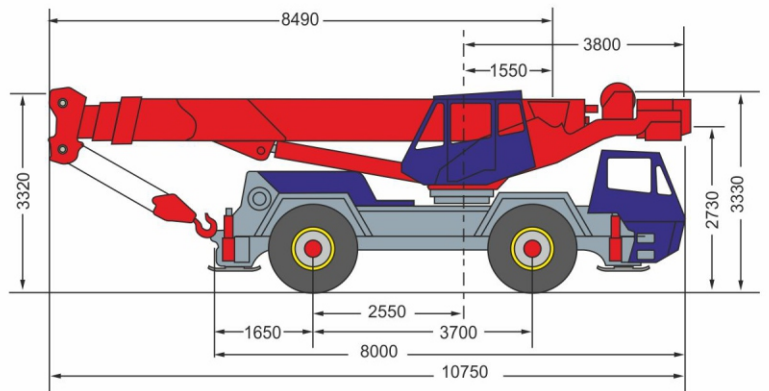

The **HARNISCHFEGER P&H S35** mobile crane has a loading capacity of **35 tons** and the boom of **35 meters** possesses the highest passing ability.

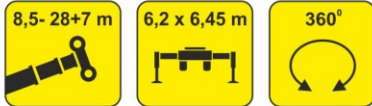

The full drive and wide radius tires allow the crane to move on boggy soil, sand and on friable snow.

The jib rotates **360 degrees**, and therefore the mobile crane can be easily placed on small sites. The driver can easily and quickly operate the crane equally from lower and upper cabin.

The truck crane is able to move diagonally (the crab steering), to turn on the spot and to move with the boom positioned either forward or back. All these qualities make it the most universal truck crane with the widest range of applications.

The **HARNISCHFEGER P&H S35** mobile crane will speed up the construction works from the very beginning. The services of the truck crane are highly demanded, so it is necessary to reserve the crane in advance.
